

## Reference Object Single-family House in Montesson/France External Thermal Insulation Composite System (ETICS) with Insulation Materials Made of Neopor®

- Energy-efficient renovation of a single-family house built in 1976
- Building floor space: 150 m<sup>2</sup>
- Duration of insulation measures: 1 month
- Insulation thickness: 12 cm
- Quality of the insulated building envelope: 0,22 W/m<sup>2</sup>\*K
- Bruno Geny, owner: "As I had to renovate the façade anyway, the extra cost for the insulation material was really affordable! Not only we reduced our heating cost, but the house is now much more comfortable to live in."
